Product Description

Universal Compatibility Better Stability and Fixation with Angled Screw Channel

Product Description:

The Angled Screw Channel is compatible with Cad/Cam systems, ensuring precision and accuracy in every use. Our product is made of high-quality titanium, which is known for its strength, durability, and biocompatibility.

The ASC is available in custom-made sizes to fit the unique needs of each patient. With angles ranging from 15 to 20 degrees, our product can be tailored to specific anatomical structures for optimal results.

The Angled Screw Channel has numerous features that make it a top choice for orthopedic surgeons. Its design allows for better fixation and stability, reducing the risk of complications and improving patient outcomes. The angled screw holes also provide greater flexibility in screw placement, making it easier to achieve the desired angle and trajectory.

Overall, the Angled Screw Channel (ASC) is a reliable and effective solution for orthopedic surgeries. Its compatibility with Cad/Cam systems, custom-made sizes, and angled screw holes make it a versatile option for a wide range of procedures. Trust the ASC for better stability and fixation in your next surgery.

Features:

Product Name: Titanium Angled Screw Channel (ASC)

Size: Custom-made

Color: Silver and Gold

Material: Titanium

Thread Type: Self-tapping

Compatibility: Universal

Features:

Provides superior stability and support

Angled design allows for accurate and precise placement

Self-tapping thread type minimizes the need for additional instruments

Custom-made size ensures optimal fit for each patient

Compatible with a wide range of bone screws and plates

Technical Parameters:

Technical Parameter	Description
Product Name	ASC (Angulated Screwed Channel)
Thread Type	Self-tapping
Features	Angled Screw Holes For Better Stability And Fixation
Compatibility	Universal
Material	Titanium
Angle	15 To 20 Degrees
Color	Silver And Gold
Cad/Cam Compatibility	Yes
Size	Custom-made

Applications:

The Angled Screw Channel (ASC) product from ADL is a highly useful dental implant product. Made of high-quality titanium, this product is designed to provide better stability and fixation thanks to its angled screw holes, which allow for a stronger hold on the implant. This makes it an excellent choice for a wide range of dental applications, from simple to complex.

The Titanium Angled Screw Channel is ideal for use in situations where extra stability is required, such as in cases where the patient has a weak jawbone or is prone to grinding their teeth. This product is also compatible with a wide range of other dental implant systems, making it a versatile choice for many different applications.

Some of the key features of the Titanium Angled Screw Channel include its universal compatibility, which makes it easy to integrate with other dental implant systems. It is also CAD/CAM compatible, ensuring a high degree of accuracy and precision in its design and manufacture. Additionally, this product is available in two different colors – silver and gold – making it easy to match with other dental appliances and fixtures.

Whether you are a dentist or a dental technician, the Titanium Angled Screw Channel is an excellent choice for a wide range of dental implant applications. With its high-quality titanium construction, angled screw holes, and universal compatibility, this product is sure to provide reliable and long-lasting results for your patients.

ADL, the manufacturer of the Titanium Angled Screw Channel, is located in Shenzhen, China, and is certified with ISO, CE and FDA. The

company has a supply ability of 630 technicians, ensuring that orders can be fulfilled quickly and efficiently. Packaging details include plastic bags and boxes, and delivery time is 72 hours. Payment terms can be negotiated and include Paypal or T/T. Minimum order quantities can also be negotiated, and pricing is available upon request.
