Product Description

Stainless Steel Space Maintainers Comfortable Hygienic Dental Appliance for Pediatric Patients

Product Description:

One of the key benefits of the Unilateral Space Maintainer is cemented in patient's mouth. Another important attribute of this dental Space Maintainer is its compatibility with other dental appliances. Patients who use braces or other dental appliances will find that the Unilateral Space Maintainer can be used alongside these appliances without any issues. This makes it a convenient solution for patients who need to maintain proper spacing in their teeth while undergoing other dental treatments. The safety of oral tissues is a top priority when it comes to dental appliances, and the Unilateral Space Maintainer is no exception. It is designed to be safe for oral tissues, which means that it will not cause any harm or irritation to the gums or other tissues in the mouth. In summary, the Unilateral Space Maintainer is an effective and convenient solution for patients who need to maintain proper spacing in their teeth. Its adjustability, hygiene, ease of use, compatibility, and safety make it a popular choice among dental professionals.
